## PROJECTS

<b>RideBuddy</b> A Carpooling website which lets us give lifts to others while traveling in our own car as well as take lifts from others traveling to similar locations. I worked on the back-end (Python/Django). <a href="http://ridebuddyin.herokuapp.com/">ridebuddyin.herokuapp.com/</a>	(Feb, 14 - July, 14) Team Size - 11
<b>ChatKeep</b> Guide: Self Guided A website which allows us to store our favorite chats from GTalk in an organized fashion by creating chat snippets. This was a part of the Google Cloud Developer Challenge 2013. I worked on the backend (Python/Webapp2). <a href="http://rishavt.github.io/projects/chatkeep.html">http://rishavt.github.io/projects/chatkeep.html</a>	(Sep, 13 - Nov, 13) Team Size - 3
<b>PandApocalypse</b> Guide: Prof. Nitin Raje A First Person Shooter game where we have to save the world from evil pandas by shooting and killing them. Made in Python + Panda3D. <a href="http://rishavt.github.io/projects/pandapocalypse.html">http://rishavt.github.io/projects/pandapocalypse.html</a>	(Aug, 12 - Nov, 12) Team Size - 2
<b>Nautilus Facebook Uploader (nfuploader)</b> Guide: Self Guided A Desktop Application made in WxPython + PyCurl to upload photos to Facebook from the Desktop. Currently Obsolete. <a href="http://rishavt.github.io/projects/nfuploader.html">http://rishavt.github.io/projects/nfuploader.html</a>	(Feb, 11 - Apr, 11) Team Size - 1
<b>SMSS</b> Guide: Self Guided A Desktop Application made in WxPython to send SMS via the internet for free, using gateways of free SMS services. Currently Obsolete. <a href="http://rishavt.github.io/smss">http://rishavt.github.io/smss</a>	(Apr, 11 - May, 11) Team Size - 1
